

NIS2 ARTICLE 21

COMPLIANCE SCAN

Prepared for

RealWindowsTest

Audit Date 2026-06-01

COMPLIANCE SCORE

10

/ 100

Major compliance failures. Organisation at serious risk.

NOT AUDIT READY — Resolve findings before regulatory inspection

EXECUTIVE SUMMARY

Compliance Score

10 / 100 — NON-COMPLIANT

Major compliance failures. Organisation at serious

risk.

Clean Pass	0
Pass / Warnings	0
Failed	2
Inconclusive	0
Critical Findings	3
High Findings	4
Medium Findings	5

NOT AUDIT READY — Findings must be resolved before inspection

DETAILED FINDINGS

Article 21(2)(a) — Network Security

STATUS: FAIL

Score: 0/100

Port scan complete: 1 host(s) scanned

CRITICAL

Dangerous port 135/tcp (MS-RPC) open on 127.0.0.1

Restrict port 135 (MS-RPC) with firewall rules

or disable the service. Use VPN or bastion for remote access.

CRITICAL

Dangerous port 445/tcp (SMB) open on 127.0.0.1

Restrict port 445 (SMB) with firewall rules or

disable the service. Use VPN or bastion for remote access.

CRITICAL

Dangerous port 3389/tcp (RDP) open on 127.0.0.1

Restrict port 3389 (RDP) with firewall rules or

disable the service. Use VPN or bastion for remote access.

Article 21(2)(a,c,e,f,h,i,j) — Windows & Active Directory

STATUS: FAIL

Score: 20/100

Targets: 127.0.0.1

Last update: 2026-05-19 (KB5089717)

Last update 17 days ago — within 30-day window

Windows Firewall enabled on all profiles

(Domain/Private/Public)

Local Administrators: NIS2SCAN\Administrator

Windows Security Event Log: 20MB max size

Windows System Event Log: 20MB max size

Windows Application Event Log: 20MB max size

RDP is enabled on this host

Windows Defender antivirus is enabled

Defender signatures 0 day(s) old — up to date

*LAPS (Local Administrator Password Solution) is
installed*

Machine is NOT domain-joined (workgroup)

MEDIUM

Windows Update not set to fully automatic

(AUOptions=3)

*Set AUOptions to 4 for automatic download and
scheduled install.*

HIGH

Windows Update service is Stopped

*Start the Windows Update service: 'Start-Service
wuauserv' and set startup to Automatic.*

MEDIUM

BitLocker status could not be retrieved — may
not be enabled

*Verify BitLocker is enabled on all drives. Run
'manage-bde -status' on the target machine.*

MEDIUM

Minimum password length is 0 (recommended 12)

Increase minimum password length to 14+ via

Group Policy: Computer Config Windows Settings

Security Settings Account Policies

Password Policy.

HIGH

Account lockout policy is not configured

Set account lockout threshold to 5 attempts via

Group Policy: Account Lockout Policy Account

lockout threshold.

MEDIUM

Windows audit policy has categories set to 'No

Auditing'

Enable audit policy for Logon, Account Logon,

and Policy Change events via Group Policy: Advanced

Audit Policy Configuration.

HIGH

SMB signing is not required — vulnerable to relay attacks

Require SMB signing via Group Policy: 'Microsoft

network server: Digitally sign communications

(always) = Enabled'. Or run:

'Set-SmbServerConfiguration

-RequireSecuritySignature \$true'

HIGH

RDP Network Level Authentication (NLA) is not required

Enable NLA for RDP: System Properties Remote

'Allow connections only from computers running

Remote Desktop with Network Level Authentication'.

Or via GPO: Computer Config Admin Templates

Windows Components Remote Desktop Services

Require NLA.

MEDIUM

Credential Guard / VBS not enabled

Enable Credential Guard via Group Policy to

protect credential hashes from memory attacks

(Pass-the-Hash). Requires UEFI + Secure Boot.

REMEDIATION ROADMAP

Priority-ordered actions to achieve NIS2 Article

21 compliance:

CRITICAL

[Article 21(2)(a)] Dangerous port 135/tcp

(MS-RPC) open on 127.0.0.1

Action: Restrict port 135 (MS-RPC) with firewall rules or disable the service. Use VPN or bastion for remote access.

CRITICAL

[Article 21(2)(a)] Dangerous port 445/tcp (SMB)

open on 127.0.0.1

Action: Restrict port 445 (SMB) with firewall rules or disable the service. Use VPN or bastion for remote access.

CRITICAL

[Article 21(2)(a)] Dangerous port 3389/tcp (RDP)

open on 127.0.0.1

Action: Restrict port 3389 (RDP) with firewall rules or disable the service. Use VPN or bastion for remote access.

HIGH

[Article 21(2)(a,c,e,f,h,i,j)] Windows Update

service is Stopped

Action: Start the Windows Update service:

'Start-Service wuauserv' and set startup to

Automatic.

HIGH

[Article 21(2)(a,c,e,f,h,i,j)] Account lockout

policy is not configured

Action: Set account lockout threshold to 5 attempts

via Group Policy: Account Lockout Policy Account

lockout threshold.

HIGH

[Article 21(2)(a,c,e,f,h,i,j)] SMB signing is not

required — vulnerable to relay attacks

Action: Require SMB signing via Group Policy:

'Microsoft network server: Digitally sign

communications (always) = Enabled'. Or run:

'Set-SmbServerConfiguration

-RequireSecuritySignature \$true'

HIGH

[Article 21(2)(a,c,e,f,h,i,j)] RDP Network Level

Authentication (NLA) is not required

Action: Enable NLA for RDP: System Properties

Remote 'Allow connections only from computers

running Remote Desktop with Network Level

Authentication'. Or via GPO: Computer Config

Admin Templates Windows Components Remote

Desktop Services Require NLA.

MEDIUM

[Article 21(2)(a,c,e,f,h,i,j)] Windows Update not

set to fully automatic (AUOptions=3)

Action: Set AUOptions to 4 for automatic download

and scheduled install.

MEDIUM

[Article 21(2)(a,c,e,f,h,i,j)] BitLocker status

could not be retrieved — may not be enabled

Action: Verify BitLocker is enabled on all drives.

Run 'manage-bde -status' on the target machine.

MEDIUM

[Article 21(2)(a,c,e,f,h,i,j)] Minimum password

length is 0 (recommended 12)

Action: Increase minimum password length to 14+ via

Group Policy: Computer Config Windows Settings

Security Settings Account Policies

Password Policy.

MEDIUM

[Article 21(2)(a,c,e,f,h,i,j)] Windows audit

policy has categories set to 'No Auditing'

Action: Enable audit policy for Logon, Account

Logon, and Policy Change events via Group Policy:

Advanced Audit Policy Configuration.

MEDIUM

[Article 21(2)(a,c,e,f,h,i,j)] Credential Guard /

VBS not enabled

Action: Enable Credential Guard via Group Policy to

protect credential hashes from memory attacks

(Pass-the-Hash). Requires UEFI + Secure Boot.
